

**eTable.**Descriptive Characteristics of Physical Therapists<sup>a</sup>

Variable	Total Sample (N=12)	Standard Care Group (n=6)	Stratified Care Group (n=6)	P
Sex (female)	6 (50)	3 (50)	3 (50)	.999
Years of practice	7.3 (5.0)	10.1 (5.3)	4.4 (2.9)	.042
Residency (yes)	11 (91.7)	5 (83.3)	6 (100)	.296
Fellowship (yes)	8 (66.7)	3 (50.0)	5 (83.3)	.221
PABS-PT (biomedical) <sup>b</sup>	27.6 (4.7)	26.7 (6.1)	28.5 (3.1)	.529
PABS-PT (biopsychosocial) <sup>b</sup>	36.0 (3.1)	36.0 (4.1)	36.0 (2.2)	.999
HC-PAIRS <sup>b</sup>	30.8 (6.4)	28.3 (7.0)	33.3 (5.1)	.191

<sup>a</sup> Values are reported as mean (SD), with the exception of sex, residency, and fellowship, which are reported as frequency count (%). PABS-PT=Pain Attitudes and Beliefs Scale for Physical Therapists (biomedical scale, potential range: 10–60), (biopsychosocial scale, potential range: 9–54); HC-PAIRS=Health Care Providers' Pain and Impairment Relationship Scale (potential range: 13–78).

<sup>b</sup> Pretraining and education scores.
